# GAVUTHAM M.S

**Software Engineer Intern Candidate**

gavutham.ms@gmail.com | +91 81243 45737 | Karaikudi, Tamil Nadu, India
linkedin.com/in/gavuthamms | github.com/gavuthamms-ctrl | gavuthamms.vercel.app

## PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA: 8.8/10) at P.A. College of Engineering and Technology with hands-on experience building 4 deployed full-stack applications using Python (Flask), JavaScript, and MySQL. Award-winning project developer — 3rd Place, College Project Expo (AI Resume Analyser). Hackathon participant in TN Impact 2026 (state-level) and Build With AI (Google x Hack2skill). Proficient in NLP pipelines (NLTK, spaCy), graph-based optimization (NetworkX), and relational database design. Seeking a Software Engineer Internship to contribute backend and full-stack engineering skills.

## EDUCATION

**B.E. Computer Science & Engineering** — **CGPA: 8.8 / 10.0**
P.A. College of Engineering and Technology, Pollachi, Tamil Nadu — Expected: 2029
Coursework: DSA, DBMS, OOP, OS, Computer Networks, Web Technologies

## ACHIEVEMENTS & AWARDS

**3rd Place — College Project Expo** — P.A. College of Engineering and Technology | 2025
Awarded 3rd place among all departments for AI Resume Analyser — an NLP-based tool built with NLTK and spaCy that parses resumes and generates ATS compatibility scores with ~85% keyword match accuracy.

## HACKATHONS & COMPETITIONS

**TN Impact 2026** — *Project: Green Delivery Optimization System*
Government of Tamil Nadu Initiative | State-Level
- Developed and pitched a carbon-emission route optimizer at state-level; built with Python (NetworkX) and MySQL, achieving ~30% simulated delivery distance reduction.
- Implemented shortest-path algorithms with eco-score comparisons across 3+ delivery strategies, demonstrating real-world logistics impact to a panel of industry judges.

**Build With AI — Google x Hack2skill** — *Project: Smart Resource Allocation System*
Google x Hack2skill | National
- Built and deployed a Flask-powered REST API backend for a full-stack resource management platform within the hackathon timeline.
- Served real-time allocation data via REST endpoints to a JavaScript dashboard with MySQL persistence across 5+ departments.

## TECHNICAL SKILLS

**Languages:** Python, C, C++, JavaScript (ES6+)

**Frameworks:** Flask, REST APIs — deployed in Google x Hack2skill hackathon

**Libraries:** NLTK, spaCy, Pandas, NetworkX, Matplotlib

**Web:** HTML5, CSS3, JavaScript, Responsive Design

**Database:** MySQL — schema design, query optimization, relational modelling

**Tools:** Git, GitHub, VS Code, Vercel, Linux CLI

**Concepts:** DSA, OOP, MVC Architecture, NLP Pipelines, Graph Algorithms

## PROJECTS

**AI Resume Analyser** — *Python (NLTK, spaCy), HTML, CSS*
**3rd Place — College Project Expo**
github.com/gavuthamms-ctrl/AI-Resume-Analyser
- Built NLP pipeline using NLTK and spaCy extracting skill, education, and experience entities with ~85% keyword match accuracy.
- Engineered ATS scoring algorithm comparing resume tokens against JD keywords across 10+ skill categories; recognized at departmental project expo.

**Smart Resource Allocation System** — *Python, Flask, REST API, HTML, CSS, JavaScript, MySQL*
**Build With AI — Google x Hack2skill**
github.com/gavuthamms-ctrl/Smart-Resource-Allocation
- Flask REST API backend serving resource data across 5+ departments; normalized MySQL schema (8 tables) cut redundant data entry by ~40%.
- Real-time JavaScript dashboard displays utilization rates, availability calendars, and allocation history.

**Green Delivery Optimization System** *Python (NetworkX, Pandas), HTML, CSS, JavaScript, MySQL*

**TN Impact 2026 — State Level**

github.com/gavuthamms-ctrl/Green_Delivery_optimization_system

- Shortest-path optimizer using NetworkX reduced simulated delivery distances by ~30%; integrated carbon emission scoring across 3+ strategies.
- MySQL backend stores 1000+ delivery records; front-end renders live route maps with optimization metrics.

## CERTIFICATIONS

**Python Programming Fundamentals** — Coursera coursera.org/verify/4L3ANC8RMJSS

**Data Analysis & Visualization in Python** — Coursera coursera.org/account/accomplishments/records/X41JCY052MEF

**Cybersecurity Fundamentals** — IBM / Credly credly.com/badges/fc89cce4-68f2-4ed4-a1bd-b4aec0414d4c

## COMPETITIVE PROGRAMMING

**LeetCode:** leetcode.com/gavuthamms — 100+ problems solved (Arrays, Strings, DP, Graphs)

**HackerRank:** Python 5-Star — hackerrank.com/gavuthamms
